PROFILE

Computer Engineering student with hands-on experience in enterprise routing and switching (OSPF, eBGP, VLAN segmentation), network security monitoring, and infrastructure virtualization. Built and operates a multi-AS routing lab and a Wazuh-based SIEM pipeline. Seeking a Network Engineering co-op to apply routing protocol and network operations experience in a real production environment.

EDUCATION

Pibulsongkram Rajabhat University • 2025 – Present

Bachelor's Degree, Faculty of Engineering and Industrial Technology — Major in Computer Engineering

TECHNICAL SKILLS

Networking: TCP/IP • VLAN (802.1Q) • OSPF (FRRouting) • eBGP/iBGP • Routing & Switching • DHCP • DNS • NAT • VPN (WireGuard) • SSH

Network Security & Monitoring: Wazuh SIEM • MITRE ATT&CK-based detection • Wireshark • Nmap • Burp Suite

Systems & Infrastructure: Linux • Ubuntu Server • pfSense • Proxmox VE • Docker • Windows

Programming: C • Python • HTML/CSS • JavaScript (Basic)

Tools: Git • GitHub • Cloudflare • Vercel

PROJECTS

Home Lab Infrastructure — Multi-AS Routing & Security Lab

- Configured OSPF (via FRRouting) and eBGP across 3 autonomous systems on a Proxmox virtualization environment; resolved an RFC 8212 route-map compliance issue affecting route propagation
- Segmented the network with VLANs (802.1Q) on pfSense; deployed WireGuard VPN and a Cloudflare Tunnel for secure remote SSH access
- Built a BIND9 + Unbound DNS layer and deployed Wazuh SIEM with custom PCRE2 log decoders and MITRE ATT&CK-mapped detection rules (e.g. T1046 port scan detection) with OpenSearch dashboards

CTF Competition — TCTT2026 (Forensics & Network Security)

- Solved network forensics challenges involving DNS-over-TCP anomaly analysis and TLS session key recovery from packet captures
- Performed PCAP-based traffic analysis and attempted RSA factoring attacks on weak 512-bit keys

Single Cycle MIPS CPU Design

- Designed and implemented a single-cycle MIPS CPU; tested instruction execution and memory operations

Portfolio Website

- Developed and deployed a personal portfolio site with Cloudflare DNS and Vercel deployment

ACHIEVEMENTS

- 3rd Place — PSRU Cyber Hackathon
- Cybersecurity Competition Participant
- Business Model Competition Participant
- SolidWorks Competition Participant

LANGUAGES

Thai: Native

English: Intermediate (Technical Reading & Documentation)

SOFT SKILLS

Problem Solving • Teamwork • Analytical Thinking • Self-Learning • Communication • Time Management
